Libpad version 4.3.1(bug-fixed version)

Libpad(.lib, .a) will be released. The following malfunction has been fixed in this version.

[Symptom]

- An controller might not be identified, or an invalid value might be returned by libpad functions. (Those cases mostly happen after half way insertion of controller connectors.)

[Note]

- Compared with the version 4.3, it takes about double time for the return value of PadGetState() to become steady after a controller is inserted. Please keep it in mind if time-out is set.
- Please use this version in combination with libapi version 4.2 or later.

[Contents of this package]

libpad.h	
libpad.lib	ver.4.3.1
libpad.a	ver.4.3.1 (for NEWS/CodeWarrior)
