twister: combination of Joint and Vertices MIMe

<description>

This data shows a combination of Joint and Vertices MIMe at same time.  
Please use mime/tutol in HMD sample program directory to run.

This data is created by the following steps:

1. "gen" is compiled from gen.c.
2. base.hmd, bend.hmd, twist.hmd and popye.hmd are generated by "gen" and "labp".
3. "mkmime" is used to generate axes.hmd and rpy.hmd.
