

June 1997.

This directory contains Adobe Acrobat "pdf" versions of the HTML documents that are on the Graphic Artist CD. If you have an HTML 3.0 compatible browser that supports tables (such as Netscape 2.0 or Internet Explorer), point your browser to the document "readme.htm" on the CD. In the latest browsers you can select "File:Open..." and then browse for the "readme.htm" file.

Otherwise, if you don't have access to a browser then read through the following documents, which are in Adobe Acrobat (however, some hyperlinks will not function):

- cat.pdf - Contains all of the categories of software that are included on the CD.
- content.pdf - Contains a table listing (sorted alphabetically) of all of the software on the CD, with version numbers and a brief explanation of each file.
- hadobe.pdf - A document that explains how to use the Adobe Acrobat reader.
- install.pdf - Information on installing the software.
- newcont.pdf - Contains important news and information. Also contains a table listing (sorted alphabetically) of all of the NEW software on the CD, with version numbers and a brief explanation of each file.
- readme.pdf - Contains information on contacting technical support.

The Adobe Acrobat reader is included on the Technical Reference CD. Follow the instructions there for setting up Adobe Acrobat so that you can read these documents.

And please -- consider getting a Web Browser! You can access technical support and download files from us on the Web, so it's really a good investment, since they're free if you have an Internet connection.
