cube0: animated cubes

<description>

This sample data shows a set of cubes that is animated by HMD animation primitive. Please use anim/tuto0 in HMD sample program directory to run.

This data is created by the following steps:

1. "rsdup" is used to create new-RSD format files (cube0.rsd, cube0.ply, cube0.mat and cube0.grp) from old-RSD.
2. cube0.cod and cube0.mot are created by text editor.
3. "rsd2hmd" created cube0.hmd from the above created files and TIM files.
