Installing and Using Adobe Acrobat

Why do I need Adobe Acrobat for PlayStation programming?

Because all of the documentation is in the ".pdf" format on the **Technical Reference CDROM** and all of the documents have been pre-indexed to allow for rapid searching on keywords. The **Technical Reference CD-ROM** is your primary documentation source. The Programmer Tools CD-ROM and the Graphic Artist CD-ROM are primarily used *only* for installation of your software. *All documentation that exists on the Programmer Tools CD-ROM and the Graphic Artist CD-ROM, including HTML documentation, is duplicated and is searchable on the Technical Reference CD-ROM.*

Where can I get a copy?

All Adobe acrobat files for both Windows 3.1 and Windows 95 are in the directory [\acrobat](#).

To install Acrobat, run the "setup.exe" program in the directory [\acrobat\16bit\install](#) (for Windows 3.1 users) or [\acrobat\32bit\install](#) (for Windows 95 users).

Alternatively, you can hunt around on the Web for the latest version at <http://www.adobe.com>.

How do I use the Adobe Acrobat reader to perform searches in multiple documents?

1. Make sure Adobe Acrobat is installed on your system.
2. Read the document [\acrobat\16bit\help\search.pdf](#)

Now you can use these two buttons:

We appreciate your comments and suggestions about our HTML documentation project. Contact us at DevTech_Support@playstation.sony.com
