

libspu for PC (Sound Tool Library)
=====

Overview

libspu for PC is composed of a library and device driver for creating an original tool using DTL-H800 board on PC/AT.

libspu for PC needs the DTL-H800 version 3.0 or later. Note the version of your DTL-H800, which is written on the board. If there is no indication, your board is version 1.0.
