

Date: 7/10/1998
Directory: \3rdParty\LightWav

This directory contains the following:

Directory	Contents
LWS2RSD	"lws2rsd.exe", a file converter for converting from LightWave's "lws" format to the extended RSD format, suitable for HMD manipulation. This is a new utility. Source code is also included.
Plugins	Contains the RSD and HMD directories. \RSD contains Geometry file loader and saver plug-ins, as well as a TIM Image file load plug-in, for use with LightWave 4.0 on four different platforms: SGI, Intel, Mac, and the Alpha. \HMD contains HMD related files for use with Lightwave. For more information refer to \HMD\Docs.
