

SDevTC users -- Please Note:

Due to the way the new SDevTC environment operates it may be necessary to manually make changes to your SN.INI file.

SN.INI has been configured to work with the default install directory structure. If you have deviated from the default path you will need to modify the following lines within the file \PSSN\bin\sn.ini to reflect your computer's directory structure:

```
[ccpsx]
library_path=c:\ps\psx\lib
c_include_path=c:\ps\psx\include
compiler_path=c:\ps\pssn\bin
assembler_path=c:\ps\pssn\bin
linker_path=c:\ps\pssn\bin
```

Additional Note: Define the environment variable PSYQ_PATH (Bug fix). In ccpsxd ver.3.05.0009 an error will be returned if PSYQ_PATH is not defined. However, it is the directory specified in SN_PATH which will actually be referred to.

Example:

```
> set PSYQ_PATH=C:\TEMP
```

For more information please refer to the following documents:

\PSSN\BIN\Readme.1st & \PSSN\BIN\readme.txt
