DTL-S2340 Runtime Library Ver.4.3

~~~~~  
This disk is a CD-ROM containing the updated version of the previous release:  
DTL-S2330 Runtime Library Release 4.1.

< Installation >

To install the contents of the Programmer Tools CD on a Win 95 system, simply place the CD in the CD-ROM drive and if auto-run is enabled the installation program will begin. Otherwise, run the file Setup.exe in the root directory of the CD-ROM. For Win 3.1 or NT users please refer to the file \html\instsoft.htm on this CD.

< License agreement, restrictions >

The usage and restrictions of this CD-ROM are governed by the contract established between the user and Sony Computer Entertainment, Ltd.

< Notes on trademarks, etc. >

The product names referred to in this document and in the CD-ROM are all registered trademarks of their respective companies.

< DTL-S2340 directory structure >

Major changes in the directory structure have been implemented in this version. Directories have been added and names have been changed, so please refer to the directory structure diagram below and the README files in the various directories.

- Performance analyzer

The performance analyzer has been updated. For details, please refer to \pa\setup.doc.

---

Directory structure changes for CD release 2.2

---

There have been some major directory structure changes on this release in comparison to CD release 2.1.

Here is a brief summary of those changes:

NEW ROOT LEVEL DIRECTORIES

|           |                                                                                                 |
|-----------|-------------------------------------------------------------------------------------------------|
| \deci     | - Contains the latest flash utilities and drivers for use with Codewarrior and other tools.     |
| \psxsound | - Contains sound tools and files which formerly were placed in \psxgraph and other directories. |
| \xdata    | - Contains large data files used by some of the samples.                                        |

DELETED DIRECTORIES

|           |                                                                                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| \betaa    | - the contents of the \betaa directory have been moved into appropriate \betaa subdirectories. ie. a beta graphics tool would now be in \psxgraph\betaa. |
| \da       | - the contents of \da has been moved to \xdata.                                                                                                          |
| \data     | - the contents of \data has been moved to \xdata.                                                                                                        |
| \execmenu | - the contents of \execmenu has been moved to \psx\sample\module.                                                                                        |

\overmenu       - the contents of \overmenu has been moved to  
                   \psx\sample\module.  
 \xa             - the contents of \xa has been moved to \xdata.

-----  
 More detailed directory restructuring information:

- Newly added directories

deci\flash27               : DECI firmware (DTL-H2700)  
 deci\psx95isa             : DECI drivers (Win95 + DTL-H2000/H2700)  
 deci\psx95pci             : DECI drivers (Win95 + DTL-H2500)  
 deci\psxNTisa             : DECI drivers (NT4.0 + DTL-H2000/H2700)  
 deci\psxNTpci             : DECI drivers (NT4.0 + DTL-H2500)  
 (For details, please refer to \deci\setup.txt.)  
 pa\psx95pa                : PA drivers (Win95)  
 pa\psxNTpa                : NT drivers (NT4.0)  
 psx\data                  : Collects together data that had been scattered in  
                             various sample directories.  
 psx\sample\kanji           : moved from \psx\kanji.  
 psx\sample\graphics\screen : moved from \psx\utility.  
 psx\sample\module\menu    : moved from \psx\utility\menu.  
 xdata                     : large data files that are not downloaded to the  
                             PlayStation, such as da, xa, mov, str.

- Directories that have been moved or deleted

bbs                        : moved to the documents disk  
 coff\news                 : deleted since newslib.z has been removed.  
 da                         : deleted since moved to \xdata  
 data                       : moved to \psx\data.  
 execmenu                  : deleted  
 overmenu                  : deleted  
 psx\doc                    : moved to documents disk.  
 psx\kanji                  : moved to \psx\sample\kanji  
 psx\sample\graphics\data   : moved to \psx\data  
 psx\sample\graphics\hmd\data : moved to \psx\data  
 psx\sample\graphics\texaddr\wave\data : moved to \psx\dataB  
 psx\sample\graphics\tmdview\data : moved to \psx\dataB  
 psx\sample\graphics\tod\tmd : moved to \psx\dataB  
 psx\sample\graphics\tod\tod : moved to \psx\dataB  
 psx\sample\sound\data      : moved to \psx\dataB  
 psx\utility\cdexec         : deleted since identical to  
                             \psx\sample\module\cdexec  
 psx\utility\menu           : moved to \psx\sample\module  
 psx\utility\screen         : moved to psx\sample\graphics\screen  
 seminar                    : moved to documents disk  
 xa                         : deleted due to creation of \xdata

For further information regarding changes on this CD please refer to the following documents:

\psx\change.txt       - Notes on changes to the library and header files  
 \psx\sample.txt       - Notes on changes to the samples  
 \readme.htm           - The front page of a comprehensive set of hyperlinked  
                          html pages that contain everything you need to know  
                          about this CD.
