

Welcome to the Graphic Artist CD. This CD contains software for creating PlayStation games and HTML documentation on the contents of this CD.

INSTALLATION:

Windows 95 users can just launch the "setup95.exe" in the root directory of the Graphic Artist CD.

Windows 3.1 users should read the document "\doc\install.pdf".

Note: If you have an HTML browser, please read about the HTML documents below.

HTML:

Please read the HTML file called "readme.htm", in the root directory of the CD-ROM. If you have an HTML 3.0 compliant browser that can process tables -- such as Netscape Navigator 2.0 or Microsoft Internet Explorer 3.0 -- then you will be able to read it for information on the CD's contents. You can access it by selecting "File:Open..." from the menu bar of your browser.

Important: The HTML links are designed for the CD only. Therefore, make sure the Graphic Artist CD is sitting in the CD-ROM drive. Internet Explorer 3.02a suffers from a bug that prevents it from processing some of the links correctly; this bug has been fixed in Internet Explorer 4.0. All tested versions of Netscape Navigator work fine, including Navigators 2.02, 3.0, and 4.0.

If you do not have access to the Web, pdf versions of these documents are available in the directory "doc" on the CD. Read the "readme.txt" there for more information on its contents.

Adobe Acrobat, which can read pdf files, is available on the Technical Reference CD.

DOCUMENTATION:

This information, as well as all other information on this CD, is duplicated and is searchable on the companion Technical Reference CD. Open the file "catalog.pdf" on the Technical Reference CD for more details.

For a quick HTML introduction to the contents of this CD, click on "readme.htm" in the root directory of the Graphic Artist CD. Your Web browser should be HTML 3.0 compliant (able to process tables).
