twinp: a pair of "puyo"

<description>

This data shows the following points:

1. Clone an MIMe object.
2. A sample usage of "MIMeID".

Please use mime/tuto2 in HMD sample program directory to run.

This data is created by the following steps:

1. "xhmd" is used to dis-assemble ../puyo.hmd.
2. The result of step 1 is edited by text editor to create MIMe keys, clone an object and change "MIMeID" that is used to identify control pad (\*.lab).
3. "labp" command created HMD files from \*.lab files created in step 2.
4. "mkmime" is used to generate twinp.hmd.
