GNU Contents

-----

The contents of this directory are derivatives of GNU source files. You are only allowed to use these files if you accept the terms of the GNU public license, which appears in the root directory of this CD as "GNU.txt".

Once you have accepted the terms, you should place the contents of this folder into your "\pssn" directory. The "\pssn\readme.txt" will then be complete.

The \gnu\dos\ directory contains 16-bit versions of the files cclplpsx.exe, cclpsx.exe, and cpppsx.exe. If you are compiling in a 16-bit environment, replace the corresponding files. Read the document "\pssn\bin\dos\readme.txt" for more information on what you need to do.

For installation instructions, refer to the document "\doc\install.pdf".

This information, as well as all other information on this CD, is duplicated and is searchable on the companion Technical Reference CD. Open the file "catalog.pdf" on the Technical Reference CD for more details.

For a quick HTML introduction to the contents of this CD, click on "readme.htm" in the root directory of the Programmer Tools CD. Your Web browser should be HTML 3.0 compliant (able to process tables).
