

Read Me file for users of Irix 5.3 and PlayStation Translator

---

Alias 8.0 and later are not supported on Irix 5.3.

When running Alias 8.0 and the PlayStation translator on an Irix 5.3 machine, a Fatal Error may be caused in Alias.

This has been fixed in Alias 8.1.

In the mean time, the included DSO library file libDtUt.so can be used to replace the current version in \$ALIAS\_LOCATION/ODS/Games/lib.

1) Change to super user:

```
su
```

2) Save the original file to a new name:

```
cp $ALIAS_LOCATION/ODS/Games/lib/libDtUt.so  
$ALIAS_LOCATION/ODS/Games/lib/libDtUt.so=
```

3) Copy over the new version of the library:

```
cp libDtUt.so $ALIAS_LOCATION/ODS/Games/lib
```
