

This directory contains general technical information on a range of subjects.
Its contents are divided into three categories:

- Technical Notes
- Manuals and White Papers
- SCEA/SCEE Test and Development Support Documents

With this edition, the documentation on GTE (Command Reference, Inline Functions and DMPSX, Programming Guide, and Register Specification) has been consolidated into the Inline Programming Reference and placed under Developer References. Performance Analyzer Manuals have also been incorporated into the DevRef Series. New Notes on CD Generator Help and Maximizing SPU RAM have been added.
