

-----  
NEW! HTML CD Navigator!  
-----

Please read the HTML file called "readme.htm", in the root directory of the CD-ROM. It contains information on the CD's contents. You can access it by selecting "File:Open..." from the menu bar of your browser.

Important: The HTML links are designed for the CD only. Therefore, make sure the Graphic Artist CD is sitting in the CD-ROM drive. If AutoRun is enabled on your machine, and the "setup" dialog box pops up, you can just hit the "No" button on the licensing dialog. This will exit the "setup" process. Then you can browse through the CD.

If you do not have access to the Web, pdf versions of these documents are available in the directory "doc" on the CD. Read the "readme.txt" there for more information on its contents.

Adobe Acrobat, which can read pdf files, is available on the Technical Reference CD.

-----  
SETTING UP ENVIRONMENT VARIABLES  
-----

If you installed binaries, you may be asked to reboot your machine in order to register your path and environment variables. Actually, a line has been added to your "autoexec.bat" file, which launches a batch file "PSPATHS.BAT" located in the root directory of your development tree.

Instead of rebooting your machine, you can simply run "PSPATHS.BAT" in a DOS-command line window to register the path and environment variables.

-----  
Where is this document?  
-----

All information on this CD is searchable on the companion Technical Reference CD. Open the file "catalog.pdf" on the Technical Reference CD for more details. The Technical Reference CD is the definitive place to look for information.

-----  
KNOWN BUGS (WITH SOLUTIONS)  
-----

If you wish to use the online help for the Graphic Artist Program "Anim" (i.e. Animation program), you should create a directory off your root drive named <root directory>:/psxgraph/doc/anim. Then copy the \*.wri files from <cdrom>:/psxgraph/doc/anim to that directory. The program has been hardcoded with psxgraph existing at your root.

This document appears in the "Graphic Tools CD" as "finish.txt" in the setup directory.
