=====
CONTENTS OVERVIEW:

This package contains libpad.lib 4.2.1, and its associated header file, and fixes bugs in libpad.lib version 4.2. A CodeWarrior version will be released in the future, as currently the CodeWarrior compiler experiences problems when compiling with Library 4.2 files. Metrowerks is working on the problem.

=====
INSTRUCTIONS:

Use PKUNZIP or WinZip to extract the contents of this file into a temporary directory. Then move the .h files into your \psx\include directory, and the .lib files into your \psx\lib files. Modify your SN.INI file in \pssn\bin to include "LIBPAD.LIB", if it isn't already there.

Libpad.lib version 4.2.1 for the Analog Controller(DUAL SHOCK)

Libpad.lib version 4.2.1 will be released. The following malfunctions in libpad.lib version 4.1.3 and 4.2 have been fixed in this version. Please use the version 4.2.1 or later (the latest available version) for developing titles for the Analog Controller (DUAL SHOCK.)

[Symptom]

1. Undefined memory area might be destroyed when Multi Tap is connected in using PadInitDirect().
2. A part of contents in the receive buffers might be wrong when PadInitMtap() is used.

[Remedy]

The above malfunctions have been fixed in libpad.lib version 4.2.1.

All the modules for the Analog Controller (DUAL SHOCK) are contained in this package as well as bug-fixed libpad.lib. Use them in this combination.

libpad.lib	ver.4.2.1
libapi.lib	ver.4.2
libpad.h	ver.4.2
libapi.h	ver.4.2
kernel.h	ver.4.2
