

DTL-H1001 Debugging Station Problems Checklist

This form must be completed and FAXed to SCEA ToolCoordinator, before your faulty systems can be replaced.

Company Name	Contact Name	Phone Number
Hardware Product Code	Serial Number	Date Problem Reported

Debugging Station Specific Questions

Step	Symptom/Test	
1.	<i>Powers up (green LED) ? [11A]</i>	
2.	<i>Has the unit been connected to the wrong voltage power supply ? (The symptoms will be complete failure, and probably a strong smell !).</i>	
3.	<i>Does your unit play audio discs ?</i>	
4.	<i>Does your unit play black discs reliably ?</i>	
5.	<i>Does the unit play gold discs, if the unit is powered up whilst resting on its side (at 90° to its normal operating position) ?</i>	

Fault Code

Please identify your fault code using the Hardware Returns Fault Coding System Sheet which is attached.

Condition Code	Fault ID
