legs: a pair of legs with Joint MIMe

<description>

This data shows the following points:

1. Joint MIMe.
2. Clone an object.
3. A sample result of "meshconv" command.

Please use mime/tutol in HMD sample program directory to run.

This data is created by the following steps:

1. Old-RSD files are created from a sample data of LightWave 3D by PlayStation plugin for LightWave3D.
2. "rsdup" is used to create new-RSD format files from old-RSD created in step 1.
3. "meshconv" is used to create mesh structure.
4. Only meshes' colors are changed to red by text editor.
5. "rsd2hmd" created a HMD file from the above files.
6. "xhmd" is used to dis-assemble the HMD file created in step 5.
7. The result of step 6 is edited by text editor to create MIMe keys and clone a leg (*.lab).
8. "labp" command created HMD files from *.lab files created in step 7.
9. "mkmime" is used to generate axes.hmd and rpy.hmd.
