Version history for SDevTC Tools (version 7/25/98)

SDevTC Tools

<DOS Environment Variable Changes>

- Starting from CCPSX version 3.06.0015, DOS environment variables are handled differently. Due to this change, the place where CCPSX searches for files is described only in sn.ini. Environment variables C_INCLUDE_PATH, COMPILER_PATH and LIBRARY_PATH will not be referenced. Please refer to pssn/readme.lst for details.
