

Files for flashing the memory of the boards have been moved to the following directories:

\psx\bin\DTLH2500\H25DRV - contains the flash memory program and files for running the DTL-H2500 under the H25DRV.EXE driver.

\pssn\bin\DTLH2500\H25BIOS - contains the flash memory program and files for running the DTL-H2500 under the SN Systems H25BIOS.COM driver (that's why it's placed in the "pssn" folder, not the "psx" folder as the file above).

Instructions on installing the boards have been moved to \psx\bin\DTLH2500, in the file "install.doc".

SN WINDOWS DEBUGGER USERS:

The flash-ROM software suitable for use with the SN Windows debugger is in \pssn\Windebug\PFlash. The Windows debugger cannot either of the previously mentioned flash software.
