FILE:

LIBMCRD421.ZIP

=====

#### CONTENTS OVERVIEW:

This file contains an updated version of libmcrd.h and libmcrd.lib (version 4.2.1), which had a bug in the MemCardGetDirEntry() function. A previous Red E Report referred to the problem with libmcrd.lib 4.2, and recommended that 1) you either use the older libmcrd.lib 4.1 or 2) wait for this patch. The Metrowerks versions for Macintosh and Windows will be posted in the near future. To verify that you have the correct library, type "pkver libmcrd.lib" in the \PSX\LIB directory. (PKVER.EXE exists in your \PSX\BIN directory.)

=====

#### INSTRUCTIONS:

Use Pkunzip or Winzip to extract the header file "libmcrd.h" into your \INCLUDE directory and the library file "libmcrd.lib" into your \LIB directory. As a general rule, always remember to modify your PSYQ.INI or SN.INI files to link to the appropriate libraries. To verify that you have the correct library, type "pkver libmcrd.lib" in the \PSX\LIB directory. (PKVER.EXE exists in your \PSX\BIN directory.)

#### RELEASE NOTES:

To licensees

April 1, 1998

R&D

Sony Computer Entertainment Inc.

#### Libmcrd.lib version 4.2.1

Libmcrd.lib version 4.2.1 will be released. The following malfunctions in libmcrd.lib version 4.2 have been fixed in this version.

#### [Symptom]

1. When the directory information of the memory card is obtained with MemCardGetDirentry(), the return value of the "files" argument will be incorrect.
2. With each of the following functions, the required number of VSyncs increases compared with the same functions in the version 4.1.

MemCardReadData(), MemCardWriteData(), MemCardReadFile(),  
MemCardWriteFile()
